PREFACE

This book has been compiled for the use of operators in wireless telegraphy and for all those who have receiving instruments. It is so arranged as to be equally available to the operator who desires to find the call of any given station, and to the operator who wants to trace instantly the calls that come to him over his receiver.

The tabulation of naval vessels gives, at a moment's glance, a comparison of the wireless equipment of the Powers. The list of commercial ship stations not only enumerates vessel equipped with wireless, but also gives the character of wireless control, the owner and the nationality. The list of coast stations is so devised that any ship operator can find the nearest station without any delay. This volume has been compiled by practical men for practical use, and every point needed will be found to have been included. This is the only complete authoritative list published.

PART I

All Stations Alphabetically by Call Letters
